SUMMARY

Aspiring UI Developer eager to apply my knowledge of front-end technologies and responsive design in a dynamic team environment, aiming to create visually appealing and functional user interfaces.

TRAINING

UI Full Stack Developer

Naresh I Technologies

📅 03/2024 Present   📍 Hyderabad,Telangana

Completing a comprehensive training program focused on UI development, gaining proficiency in key technologies including HTML, CSS, JavaScript, and front-end frameworks

- Gaining experience in integrating APIs and working with databases to create full-stack web applications.
- Collaborated with fellow trainees in a team environment to design and implement user-friendly interfaces.
- Acquired skills in responsive design, ensuring applications were optimized for various devices and browsers
- Learning best practices in coding standards and version control using Git.

PROJECTS

Doctor Appointment App

📅 11/2024 Present
🔗 https://prescriptoappointment.netlify.app/

The Doctor Appointment App allows admins to manage customer details, doctors, and payments, while customers can update their personal information.

- **React** To build dynamic user interfaces for admin and customer dashboards.
- **Node.js & Express** For building the backend API to manage routes and logic efficiently.
- **MongoDB** To store and manage user, appointment data as a NoSQL database.
